Kian Khayat

Junior Software Developer | Web, Python & IT Systems

Building toward AI & Cybersecurity | Open to Ausbildung, Duales Studium, Junior Software and Junior IT roles

PROFESSIONAL SUMMARY

Junior software developer with hands-on experience in computer hardware, operating systems, troubleshooting, web development, Git/GitHub, and small-scale automation. Built practical projects using HTML, CSS, JavaScript, Python, WordPress, and basic backend systems. Currently strengthening skills in backend engineering, Linux, AI, and cybersecurity, with a long-term goal of working in Germany.

PROFESSIONAL EXPERIENCE

IT Technician / Computer Hardware & Systems Support

Computer Store, Isfahan Computer Market | Isfahan, Iran | 2022 – 2026

- Assembled desktop computers and handled hardware upgrades and component replacement.
- Installed Windows and other operating systems, along with drivers, software, and utilities.
- Diagnosed hardware and software issues and checked GPU and storage-device health.
- Worked with LAN cabling, modem/router setup, and local connectivity tasks.
- Helped set up a gaming center, including cabling, connecting multiple systems, and installing management software.

SELECTED PROJECTS

ROMANO — Multilingual Digital Restaurant Platform

Creator & Full-Stack Developer | 2026

Customer-facing digital menu and admin workspace designed as a future multi-restaurant SaaS foundation.

- Built with HTML, CSS, JavaScript, Node.js, Fastify, PostgreSQL, Docker, REST API, and PWA concepts.
- Implemented multilingual support (Persian, English, Turkish, Arabic), RTL/LTR handling, role-based access, authentication-related features, CSRF protection, rate limiting, audit logging, and SQL migrations.

github.com/cianium/Online-Menu | cianium.github.io/Online-Menu/

Nightwalker Hub

Frontend Developer / Creator | 2026

Responsive content hub for a Persian-speaking gamer and streamer.

- Built with HTML, CSS, JavaScript, and GitHub Pages.
- Integrated live-stream status checks, latest YouTube video loading, browser notifications, and fallback behavior.

github.com/cianium/Nightwalker- | cianium.github.io/Nightwalker-/

FileX

Python Developer | 2026

Lightweight file organizer for Termux / Android storage.

- Created a Python tool that organizes files by extension and detects duplicates using SHA-256 hashing.
- Skips development projects and important system/development folders to reduce accidental reorganization.
